Zebra's HC100™ Patient I.D. Solution

Patient Wristbanding Made Easy

Easiest Way to Ensure Accurate Patient ID

Developed specifically to meet the unique needs of healthcare providers, Zebra's reliable HC100 Patient I.D. Solution makes wristband printing easier and more cost-effective than any available laser solution.

Zebra's Patient I.D. Solution combines the reliable HC100™ direct thermal printer with easy-to-load cartridges containing the only antimicrobial-coated wristbands on the market—Zebra's Z-Band® wristbands.

Simple to Use

There's minimal training required. Just pop the wristband cartridge into the HC100 printer—and print individual wristbands on demand. Compare these two simple steps with laser printing, which often requires staff to load forms into a special tray, print labels, apply a label to the band, and fold a laminate over the band.

The HC100 printer detects the wristband size—adult, pediatric or infant—and automatically calibrates its settings for optimal print quality. You get long-lasting Z-Band wristbands with crisp text and bar codes that remain scannable for longer than the average patient stay. When cartridges are empty, just return them for recycling.

For optimal printing quality and proper printer performance, the HC100 printer is designed to work only with cartridges of genuine Zebra™ Z-Band wristbands.

Fits Your Environment

With more connectivity options and a smaller footprint than any laser printer, the HC100 printer fits your workspaces and works with your network. Zebra partners with the leading Admissions Discharge Transfer (ADT) software providers to enable healthcare providers' easy integration of our bar code print solutions.

Lower Total Cost of Ownership than Laser Printers

The costs and inefficiencies associated with laser printing add up fast. Look at how Zebra's thermal wristband printing can save in the long run:

- Avoids the wasted wristbands and labels as well as the extra steps required for printing and assembly that users experience with typical laser printing processes.
- Requires fewer help desk and printer maintenance calls, and no expensive toner to replace or store.
- For added peace of mind and a cost-effective way to plan for your annual maintenance expenditures, protect your investment with a ZebraCare™ service agreement.

Z-Band Wristband Benefits

Zebra's direct thermal Patient I.D. Solution accommodates our entire line of white and color Z-Band wristbands—both Z-Band Direct with adhesive tab and Z-Band QuickClip™ with clip closure—in infant, pediatric and adult sizes.

- Z-Band wristbands feature our patent-pending antimicrobial coating, which independent lab tests show effectively protects the wristband against *S. aureus, E. coli, P. aeruginosa* , and MRSA Type II, III, and IV—the leading causes of hospital infections.
- Z-Band meets the patient I.D. guidelines of the American Hospital Association, The Joint Commission and the Health Insurance Portability and Accountability Act (HIPAA).
- Bar codes on Z-Band wristbands are able to withstand water, soaps, foams, alcohol and other common solvents found in healthcare environments and remain scannable longer than the average patient stay.

Effectively meet your patient safety initiatives as you improve your processes with bar coded thermal wristbands—delivered the easy way. To learn more about Zebra's Patient I.D. Solution, call +1 800 423 0442.
